One in five people in the U.S. smoke. One in ten are trying to quit. One in three smokers will die prematurely as a result of smoking.

When does a casual smoker become addicted? "Casual smokers" are twice as likely to NEVER quit smoking.

Within 1 Year of Smoking, 90% of all smokers say they tried to quit, but can't. The average smoker loses 15 years of their life from smoking.

Statistics taken from the American Lung Association 2004 Report. Brought to you by Student Life. Get more information at <http://www.whyquit.com>. **You can quit with 20 million other smokers on November 17.**
